No play in recent years has so served for editorial comment or even judicial reference as has "The Thief," which will be seen at the opera house to-night. This fact constitutes a great tribute to the excellence of the motive, and the masterly treatment of a great and wide-appealing theme by the dramatist, and the exceptionally intelligent and artistic interpretation by the players of the author's creations. "The Thief," when its rich and varied significance is sifted and analyzed, is primarily a play dealing with the home—the basis of modern civilization. In treating of the home, Bernstein strikes out into an altogether new path—one which has laid hidden from the casual traveler and which only an original observer would pursue.
